

Rabbi Kindalo

Software developer

"I'm a versatile developer with a strong foundation in building scalable and efficient applications. With proficiency in React JS, I craft intuitive and dynamic user interfaces. Leveraging Express JS, I create robust and scalable server-side solutions. Additionally, my skills in iot enable me to tackle complex tasks with ease. I'm passionate about staying up-to-date with industry trends and leveraging my expertise to deliver innovative solutions."

Experience

○ 2018 - 2019

WebMark security

Developer

I successfully developed a starting gps tracking system seamless connectivity between the sever fron end with iot trackers still provide tec support

○ 2020 - 2020

TockPay

Developer

I successfully developed admin dash and components of front end client app

○ 2020 - 2020

REUMAIFAB TECH & Marketing Service

Developer

I utilized my skills in Python and Django to develop and maintain web application, writing clean and efficient code to deliver high-quality solutions. I designed and implemented database models, views, and templates, leveraging Django's framework to ensure scalability and reliability. I also collaborated with senior developers to troubleshoot issues, debug code, and optimize performance. Additionally, I worked on implementing new features, refactoring existing code, and ensuring seamless deployment of applications, further enhancing my expertise in Python and Django development.
